PROFILE

Web developer focused on frontend engineering with hands-on experience building fullstack applications using React, Next.js, and TypeScript. Background includes a junior developer role delivering company-profile, retail, and hotel booking websites, and currently co-running GerobakLink, a website development service, as founder and frontend lead. Comfortable owning a project end to end, from UI implementation to database and payment integration.

EXPERIENCE

GerobakLink — Founder & Frontend Specialist

May 2026 – Present

Website development service co-founded with a backend specialist partner

- Built and maintained the frontend for GerobakLink's platform and its customizable website templates.
- Designed and implemented responsive UI layouts across 9 published website templates, with 3 additional templates in development.
- Delivered a paid client project, adapting an existing template to the client's requirements.
- Collaborated closely with a backend specialist on feature integration and template architecture.

PT Nusantech — Junior Web Developer

Jun 2022 – Jun 2023

Remote

- Built company-profile, retail, and hotel websites, including a hotel site with a room booking feature.
- Contributed to UI development and feature implementation using HTML, CSS, JavaScript, React.js, Next.js, and Node.js.

SELECTED PROJECTS

KopiMage — Fullstack Cafe Website

Next.js, TypeScript, Prisma, PostgreSQL, Midtrans

- Built end to end as a solo fullstack project, including database schema and backend logic with Prisma and PostgreSQL.
- Integrated and tested the Midtrans payment gateway for online orders (later deactivated; site remains live).

LaukAtMe — Fullstack Seafood Store Website

Next.js, TypeScript, Prisma

- Developed independently as a fullstack project with product catalog and shopping cart functionality.
- Currently in use by the store owner to support real sales.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Next.js, TypeScript, Tailwind CSS
